counseling

Delivering genetics
expertise to your patients

Genetic counseling is an integral part of the services we provide to you and your patients.

Our national network of ~100 genetic counselors dedicated to patient care

Integrated Genetics provides accessibility and genetic counseling expertise directly to your patients through our national network of board-certified and state-licensed genetic counselors and medical geneticists.

OUR MODEL

25⁺

25+ years of experience

BROAD, YET FLEXIBLE, GENETIC COUNSELING SERVICES FOCUSED ON:

Prenatal and preconception

Infertility

Hereditary cancer

CONVENIENT ACCESS PROVIDING YOU WITH:

Nationwide coverage

Virtual counseling access through audio or video connections

Online scheduling for patients

Integrated Genetics delivers expertise to your practice through genetic counseling services tailored to you and your patients. Call us at 855-GC-CALLS or 855-422-2557.

Personalized patient support

Customizable genetic counseling services to meet your patients' needs

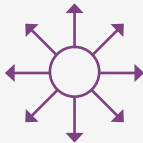

Integrated Genetics' genetic counselors translate and communicate genetic information into practical, understandable terms. They support patients, physicians and other providers through the following process:

			
1	2	3	4
Identify genetic risks	Explain appropriate genetic testing options	Discuss implications of test results	Support informed decision-making

Our genetic counselors provide a broad range of services to support you and your patients, including:

 GENETIC EDUCATION VIDEO SERIES	 GENETIC RESULTS COUNSELING	 COMPREHENSIVE GENETIC COUNSELING	 PHYSICIAN & PRACTICE SUPPORT
<ul style="list-style-type: none"> • Targeted education to help patients navigate various genetic testing options and alternatives • Discussion of benefits, risks and limitations • Review of implications of genetic testing results 	<ul style="list-style-type: none"> • Discussion between patient and genetic counselor about the patient's result • Explanation of the risks identified • Overview of any appropriate follow-up testing 	<ul style="list-style-type: none"> • In-depth review of the patient's personal and family medical histories • Identification of genetic risk factors and appropriate testing options • Patient education and support for informed decision-making 	<ul style="list-style-type: none"> • Coordinated patient care to assist you in offering the right test at the right time • Written summary for all counseling events and additional case consultation available to you as needed • Customized training and genetic education for your practice
