 Inheritest High Frequency Panel GeneSeq® PLUS

Our Patient Engagement Program is designed to support your specific needs

Price transparency is important to us — our Every Mom Pledge team is ready to answer questions about your insurance and cost options. Many insured patients will pay \$0 based on Labcorp internal billing data*; however, we have flexible programs to help meet personal financial needs. This includes an opportunity to participate in our Moms Helping Moms of Tomorrow initiative through which participants are eligible for a test cost of:

\$299 for MaterniT 21 PLUS

\$349 for Inheritest CF/SMA, Core, 14-gene, High Frequency, 100 PLUS and 300 PLUS Panels

\$399 for Inheritest 500 PLUS Panel and GeneSeq PLUS

\$499 for MaterniT GENOME

*Based on internal Labcorp billing data; data includes claims adjudicated as non-covered and for which there was no patient responsibility indicated by the insurance company. Patients should review their EOB statement from their insurance company, who should be contacted directly with any questions about why the insurance company did not pay for these services.
